Get Current Employment on Consumers Who Matter Most to You

As consumer debt increases and disposable income shrinks, you need an ever-reliable source of current employment information to maximize your efforts on charge-off prevention and recovery – determining those customers most likely to afford or repay your products and services.

For utmost flexibility and efficiency, The Work Number finds and filters employment information on your customers – returning only employment records that are most actionable by you. Employment searches can be performed by a batch process or individually on the web.

Why Filtered?

The Work Number Filtered lets you receive only results that include customer profiles important to you. This allows you to be cost-effective in evaluating and managing portfolios.

Example:

- (suppress industry) Temporary Staffing
- (suppress job status) part-time; on-leave
- (include time frame) employment updated in last 60 days

Actionable Employment Information – Batch Filtered Results

Simply submit a portfolio of customer accounts to The Work Number Filtered. We'll ask you to pre-determine the customer criteria that you deem important, so all employment results will be filtered to include only customers which you wish to know their place of employment – allowing you to take action.

Need to Locate Just a Few Consumers?

With The Work Number Filtered you are also able to look up SSNs individually, allowing you to instantly locate consumers. Our web application has the same great filtering ability as our batch application, returning only actionable data.

Filter results by type of employment: (a few popular filters include)

Consumer Category	Filter Selections
Date payroll last received	30, 60, 90 days, etc.
Employer industry type	Retail, temporary staffing, finance, etc.
Job status	Active, inactive, seasonal, part-time, temporary, etc

Ideal Applications for The Work Number Filtered:

- Receivables Management
- Portfolio Valuation
- Strategic Workflow
- Customer Segmentation
